

1. How far in advance do you like to have finished your preparation for a lab? The night before, two days before, or more?

Whenever, as long as it is done by lab.

2. How do you like to interact with a partner - in person, online, or a mixture?

I like to work on the lab independently, then we can come together and compare.

3. What is your personal approach to resolving disagreements - for example, do you prefer to raise issues in person, or by email/message? Are you unlikely to bring up issues because you don't like conflict, or do you like to discuss issues as soon as they arise, or something in between?

Either. I like to discuss issues.
